As a company of scientists, we understand how important it is to work with antibodies that are specific and consistent from lot to lot. To ensure product performance, we validate all our antibodies in-house, in multiple research applications. Should a product not perform in your experiment, the same expert scientists who produced your antibody will guide you through a few simple troubleshooting steps, and if your issue is not resolved, we will replace the antibody or provide you with a credit.

Recognized as the **2018 CiteAb antibody company of the year** and **2018 antibody company succeeding in cancer biology**, our team of scientists made 35 of the top 100 cited antibodies in 2017**. That's why you can have confidence that, when you see the CST brand, you're using the best antibodies available.
