Starting With Pretreated Water? We Have The Milli-Q IQ7000, For You!

Milli-Q® IQ 7000 Special \$10-13k

- Simple and intuitive dispensing – from drop-by-drop up to 2 L/min
- Powerful combination of purification media – JetPore® mixed-bed ion exchange resin and IQNano® ion-exchange media and activated carbon
- Versatile configurations to optimize lab space
- Requires pretreated water using EDI, DI, RO or distillation technologies

Starting With Tap Water? We Have The Milli-Q Integral & Milli-Q Direct, For You!

Milli-Q® Integral 3, 5, 10 or 15 Special \$12-20k

- Integrated pure (Type II) and ultrapure (Type I) water from potable tap water in a single unit, with the use of patented Elix EDI distillation technologies.
- Produce 70 – 360 liters of water per day
- Advanced water quality monitoring and data tracking with Millitrack software.
- Manual and automatic dispensing

Milli-Q® Direct 8 and 16 Special \$8-12k

- Produces 8 or 16 liters of pure (Type III) water per hour from potable tap water
- Dispenses ultrapure water (Type I) up to 2 L/min
- Manual and automatic dispensing
